...implanting source and drain regions of said first FET aligned to said edges of said horizontally extending portions of said first spacers of said first gate stack;

removing said second spacers and said horizontally extending portions of said first spacers by an anisotropic vertical etch process after forming said source and drain regions of said first FET; and

implanting source and drain regions of said second FET in said substrate aligned to said walls of said vertically extending portions of said first spacers of said second gate stack after removing said horizontally extending portions, as required by claim 15.
